You handle requests for entity data, documents and organization charts daily. hCue is the system that makes it easy to find, update and share information across your organization, so you can meet the relentless challenge of doing more with less.

A DYNAMIC SYSTEM THAT KEEPS YOU IN CONTROL
hCue is a central, secure source where you can manage vital company information. Share data on demand, prepare for audits, stay ahead of compliance deadlines, create organization charts in real time, improve efficiency and more.

ORGANIZED, ACCESSIBLE AND SECURE
Easily update and access the information your internal and external stakeholders ask for. You choose how to share, with progressive levels of role-based security. hCue’s APIs make it easy to integrate with other internal systems, including HR systems. Paralegals are alerted to personnel changes that may impact the entities that they manage. DocuSign integration and single sign-on enhance security and streamline workflows.

DESIGNED FOR YOU BY COMPLIANCE EXPERTS
Every detail of hCue was designed with hands-on input from corporate secretaries and other legal professionals. From the data structure and security protocols to customizable fields and organization charts, CT’s deep compliance knowledge base helps your whole organization stay ahead of requirements. hCue’s powerful organization chart function automatically updates to reflect new data entered into hCue. Create customized, detailed org charts with unique shapes and colors to visualize real time structure, compare two points in time, and see future “what if” scenarios.

GET STARTED QUICKLY AND CONFIDENTLY
Successful implementation is part of the hCue system. CT’s industry-leading transition and implementation process starts with assessing your organization and auditing your data. You can be confident that you’re starting with up-to-date, accurate information in a system configured to meet your needs.

HCUE - A DYNAMIC INFORMATION CENTER FOR YOUR ENTITY DATA

A Single, Secure Source of Current Entity Data

**HCUE ENTITY MANAGEMENT SYSTEM**
CT’s knowledgeable implementation and support team helps you integrate hCue with your process and workflows.

**PRODUCT FEATURES**
- One platform links all your entities and appointments: active, inactive, foreign, domestic and global
- Create automated filing calendars for annual reports, registration, licenses, permits and other date-driven compliance requirements
- Customizable fields capture industry- and company-specific data
- Role-based access keeps stakeholder communication within your control
- Manage digital documents, e-signatures and evidence storage in a seamless workflow with DocuSign integration
- High level security protects your data – SSAE 16 SOC 1 Type II
- Optional single sign-on gives your department quick access and enhanced security
- Share entity data with others using hCue’s APIs
- Build and maintain org charts by division, country, business group, and other entity properties, and organize large org charts into sections with Chart Books
- Compare entity structures back in time and look into the future with “what if” scenarios
- Accept auto-updates from CT to streamline the workflow of self-managing hCue
- Ongoing support starts with a proprietary implementation process

**BENEFITS**
- Keep company information up-to-date and accessible in a central database
- Respond quickly and easily to information requests
- Avoid fines and penalties by staying ahead of compliance due dates
- Streamline workflows for managing complex and dynamic entity structures
- Safeguard your vital corporate data
- Manage all of your org chart needs end-to-end from within hCue, including point-in-time and what-if comparisons
- Be confident that you’re starting with current, accurate data
- Save time and steps when sending documents for signature and storing them as evidence
- Maintain stricter control over system access with optional single sign-on
