> System Integration

Expertise and technology can transform your lien process

You depend on accurate and complete loan information to reduce your risk and manage your portfolio effectively. But assembling that information, and keeping it current, is a drain on your team's time. Working with multiple systems, gathering data from external sources, rekeying data into a central system, then copying that data back to an external system results in decreased employee productivity, higher risk of data entry errors and delays in closing loans.

Gain Efficiencies and Productivity

Lien Solutions' Professional Services have helped hundreds of clients integrate their loan processing systems with our interfaces. We work closely with you so you can benefit from an end-to-end automated solution that integrates loan processing with lien processing to optimize your workflows.

- **UCC Filing Interface:** Integrate your LOS system with our UCC filing services. Our pre-built plug-and-play modules are compatible with some of the most popular LOS systems on the market. Or, we can partner with your development team to assist with a custom interface solution that meets your needs.
- **UCC Search Interface:** Easily query UCC filing information by integrating your LOS system with our UCC search services.
- **Backend Image Extraction Interface:** Export UCC filing images for automatic import to your LOS system.
- **Mortgage Interface:** Integrate your LOS with Lien Solutions' mortgage filing solution.
- **Residential Search Interface:** Incorporate a front- or back-end interface with our residential search solution.
- **CNV Interface:** Query entity information through a direct integration with your LOS system even if you don't use our Corporate Name Search services.
- **Interface Services:** We'll help you troubleshoot issues as needed by enhancing the existing interface to meet your evolving environment or updating the interface configuration/profile information.
