# Sensitivity Codes

*Stay compliant and ensure sensitive information is protected*

Protecting sensitive patient and member information is critical. Sensitivity Codes is a proprietary content set that contains six categories of sensitive information including Substance Abuse, Mental Health, Family Planning, Genetic Testing, HIV, and STDs. Sensitivity Codes enables hospital providers, payers, and HIEs to identify and filter sensitive diagnoses, procedures, labs, drugs, and mental health codes to protect patient and member confidentiality.

## **With Sensitivity Codes, you can:**

### **Ensure sensitive information is protected**

Almost 40,000 sensitive codes including ICD-9-CM, ICD-10-CM, ICD-10-PCS, LOINC®, SNOMED CT®, SNOMED CT US Extensions, CPT®, HCPCS, UB-04® Revenue Codes, RxNorm, and NDC.

### **Stay compliant with legal, regulatory, and licensing requirements**

Stay compliant with 42 CFR Part 2, HIPAA, and varying state laws including concealment of information of minors under 18 years of age.

Health Language is a licensed distributor for CPT, UB-04, RxNorm, and hundreds of other standardized code sets—offering a single data provider while also ensuring compliance.

### **Build trust with patients**

For business reasons, you may decide to segregate certain types of patient information to assure patients and consumers that their sensitive information will be kept secure, private, and protected.

Health Language offers the only complete cloud-based solution with a full suite of applications that let you model, map, group, search, and distribute data throughout your enterprise.

Need access to content quickly? You can be up and running on the latest content and applications less than two weeks after signing your contract.

## Data, software, and services customized to your needs.

*Utilize HL-published sensitivity lists:* Leverage HL's Sensitivity Codes as your standard and avoid managing and updating these lists with internal resources.

*Create customized sensitivity lists:* Create and maintain customized versions of HL's Sensitivity Codes using HL software and avoid managing flat file lists of codes.

*Always up to date:* We coordinate with the world's leading standards bodies to ensure you have the latest and most up-to-date sensitive diagnoses, procedures, labs, and drug codes.

## Health Language

Terminology management solutions from Health Language can unlock your healthcare data to help you maximize reimbursement, meet regulatory compliance, improve operational efficiencies, and enhance patient care. Health Language provides powerful data solutions that can be customized to your organization's needs.

Health Language solutions are designed to support health IT vendors, payers, health systems, HIEs, research, and government organizations to improve search and documentation, support reference data management, enable interoperability and data normalization, improve quality measure reporting, maximize revenue cycle management, meet Meaningful Use compliance, and enhance analytics.

## Customized to Your Needs

Health Language offers a suite of professional services designed to support your training, education, implementation, and consulting initiatives. Implementation and consulting services help health plans implement optimal data governance infrastructures and fully realize the potential of clean, accurate, and complete data in their healthcare IT systems.

We also supply staff augmentation and management services for short-term or long-term projects. All our services can be customized to your organization's needs.
