## The Copyright/Trademark Interface: How the Expansion of Trademark Protection Is Stifling Cultural Creativity

By Martin Senftleben

Drawing on aesthetic, sociological and economic theories that support initiatives to safeguard the autonomy of the literary and artistic domain and support the remix activities of artists, the author suggests sound criteria for identifying signs with cultural significance that should be excluded from trademark registration. The book shows how intellectual property law can make rights cumulation strategies less attractive and avoid the loss of inner consistency and social legitimacy, easing the tension between indefinitely renewable trademark rights and the need to preserve and cultivate the public domain of cultural expressions and other intellectual creations that enjoy protection for a limited period of time, such as industrial designs and technical know-how.
