## EU Cross-Border Commercial Mediation: Listening to Disputants - Changing the Frame; Framing the Changes

By Anna Howard

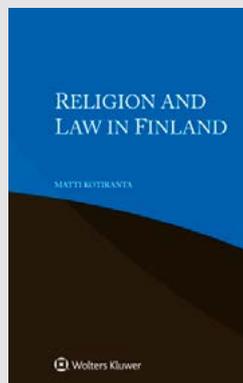

EU Cross-Border Commercial Mediation is a book which focuses on the European Union's (EU's) continued efforts to encourage the use of cross-border mediation and examines why such efforts have had a limited impact. It does so by drawing on rare, and at times surprising, detailed insights from the in-house counsel of multinational companies regarding their use of EU cross-border commercial mediation. By viewing mediation through the disputants' perspective, new and important findings regarding why disputants do, and do not, use cross-border mediation have emerged. While these findings are of primary relevance to EU policy and practice, they have implications far beyond the EU context at a time of increasing international interest in cross-border mediation.

## Exceptions in EU Copyright Law: In Search of a Balance Between Flexibility and Legal Certainty

*By Tito Rendas*

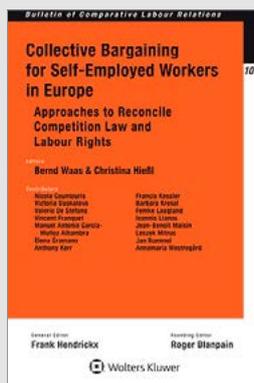

Exceptions in EU Copyright Law deals with comprehensive redesigning of Article 5 of the Information Society Directive (InfoSoc Directive). In a copyright system characterised by broad and long-lasting exclusive rights, exceptions provide a vital counterweight, especially in times of rampant technological change. The EU's controversial InfoSoc Directive – now two decades old – lists exceptions in which an unauthorised user will not have infringed the rightholder's copyright, and there have been calls for reform in order to achieve a better balance between flexibility and legal certainty. The question to reform or not to reform this legal framework has been considered in great depth in this book, providing detailed theoretical and normative analysis of the Directive, the national and CJEU case law arising from it, and meticulously thought-out proposals for change.

## Exploring the Nexus Doctrine In International Tax Law

By Ajit Kumar Singh

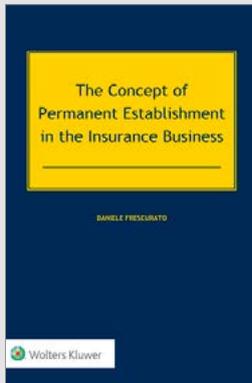

Exploring the Nexus Doctrine in International Tax Law examines the concepts of territorial nexus for jurisdictional tax apportionment and brings into sharp focus the emerging economic connection as a jurisprudential justification for taxing non-residents' income. In an age when cross-border business transactions are increasingly affected without the transference of physical products, revenue concerns of states have led to a multitude of tax disputes based on the concept of 'nexus'. This important and timely book is the most authoritative to date to discuss one of the major tax topics of our time – the question of how taxing rights on income generated from cross-border activities in the digital age should be allocated among jurisdictions.
