Vertical agreements between undertakings at the various levels of a supply chain have long been seen as a fundamental focus for antitrust legislation, such as the European Union’s Vertical Block Exemption Regulation (VBER). It goes without saying that such issues are particularly prevalent in digital markets. This authoritative commentary analyses the main restrictions in vertical agreements, emphasising the numerous new and contentious issues arising in the context of Internet distribution. It offers both legal and economic perspectives, as well as examines enforcement and possible changes to the legislation.
Information Exchange Between Competitors in EU Competition Law
By Martin Gassler

With a dearth of other available sources, this brief yet extensive review of a much-debated topic in competition law lends clear guidance to practitioners in assessing the issues surrounding information exchange. The book will also prove to be invaluable to competition law academics, competition lawyers and competition authority officials across Europe.

Competition Law of the European Union, Sixth Edition
By Van Bael & Bellis

Competition Law of the European Union provides a comprehensive analysis of the EU competition rules as developed primarily by the Commission, the General Court and the Court of Justice. The new Sixth Edition of a major work by the well-known competition law team at Van Bael & Bellis in Brussels reflects the many developments in the case law and relevant legislation that have occurred since the Fifth Edition in 2010. This edition follows the successful format of previous editions in covering all substantive and procedural aspects of the EU antitrust rules and merger control, as well as including a much-extended chapter on private enforcement and, for the first time, a dedicated section on competition law in the pharmaceutical sector.
