Foster Agility, Manage Risk and Drive Efficiency Across the Life Sciences’ Supply Chain

For pharmaceuticals and life sciences, risk exposure has been amplified by urgency and uncertainty in today’s health climate. To boost R&D and bring lifesaving drugs to market, finance needs the insight to be agile and the data intelligence to make better decisions faster.

CCH Tagetik leverages diverse, granular data from across the organization to elevate clinical lifecycles and accelerate financial performance. Through AI, a central data model, and advanced data processing, you’re equipped with the predictive planning power to match supply realities to demand assumptions, optimize profitability, boost clinical trial efficiency and accelerate R&D. By connecting production, COGS, cash flow, CAPEX and financial plans in our unified platform, you’ll fine-tune drug development lifecycles from trial to production to delivery.

CCH TAGETIK FOR PHARMA AND LIFE SCIENCES

**Improve Operational Efficiency**
Tie production plans, COGS and financial plans together in our unified planning platform. Choose the best path forward — for both finance and production — by analyzing dynamic variations of COGS or R&D costs and gauging their relative impacts on profitability. A single source of truth ensures you’ll have full control of production cost plans across processes, trials, and brands.

**Optimize CAPEX Planning**
Measure the impact of R&D CAPEX on financial plans to ensure today’s purchases align with your long-term needs and future growth objectives. Use our advanced expense planning tools to predict the effects of CAPEX — like R&D investment, manufacturing capabilities, expansion of research facilities — on the revenue plan, balance sheet and income statement.

**Accelerate the Financial Close**
Manage complex global requirements in a streamlined financial close workflow including account reconciliation, local close, group consolidation, regulatory reporting, disclosure, and iXBRL. To boost accuracy, our built-in intercompany cockpit, multi-GAAP/IFRS support, and currency translation fosters consistency enterprise-wide.

**Produce Accurate Forecasts — Fast**
Elevate scenario planning with predictive analytics and AI. Create budgets, plans, forecasts and models according to industry drivers like trial, brand, and research facility, and take all variables — like new regulations, scientific discoveries, or regional rules — into consideration. With drill down, real-time analytics and ad hoc reports, you’ll provide the CFO with timely figures so they can advise on strategic decisions — confidently.

**Maximize Profitability and ROI**
From R&D, to clinical trial, launch until the end of its life, our solution helps you understand the nuances of costs and factors affecting profitability. Explore performance data at granular levels, like product, trial, facility, channel or country. Drill across unlimited dimensions to see how operational costs impact profitability in real-time. Analyze profitability variance while making on-the-fly adjustments.

**Timely Insights for Faster Decisions**
Maximize the ROI of clinical trials. Our powerful data engine centralizes granular information across R&D, trials, and go-to-market, giving you transparency into your true drivers of financial costs and operational efficiency. Perform in-depth modeling and analytics to transform raw data into actionable insights. Use built-in what-if scenario modeling to connect financial results and operational activities.
Modelling and What-if Scenario Analysis: Project future plans and play out what-if scenarios to see impacts on P&L, cash flow or balance sheet of the different strategies — like insourcing or outsourcing, stock level, workforce delocalization.

Analytic Information Hub: Underpinning all solutions is this powerful data engine. It centralizes granular financial and operational information and enables in-depth modeling and analysis — fast.

Bottom-up Costs Calculation: Empower Finance to control the dynamic variation of COGS and R&D by analyzing the relative impact on profitability and gathering data from all functions, processes and flows.

Accurate Capital Expense Planning: Plan your CAPEX for R&D investment, manufacturing capabilities, construction, expansion of production facilities, and more.

Artificial Intelligence for Planning: Develop long-term, top-down corporate plans including external factors that can affect product launch, like new regulations, workforce restriction, limitation on material shipping. Set targets that drive short-term, bottom-up tactical budgets.

Rolling Forecasts: Respond flexibly to market changes by building periodic, rolling forecasts that automatically combine data from plans, budgets and actuals.

Manage Uncertainty: Identify, assess risks and measure the volatility of decisions. Set metrics to monitor KPIs, establish risk thresholds, and play out what-ifs according to risk-exposure.

Extensive Profitability Analysis: Understand the drivers impacting profitability throughout the product lifecycle — from R&D to clinical trial, launch until the end of life.

Data Governance & Lineage Tracking: Starting from transactions and all the way through the cycle, manage all data within our integrated platform.

Financial Consolidation: Use our consolidation engine to streamline the financial close from end-to-end with support for multiple GAAPs, IFRS, currencies and complex operational structures.

Financial Intelligence: Improve insights with double-entry logic, currency translation, management, legal and regulatory roll-ups, unlimited multi-currency and interest support.

Collaboration Tools: Teams work simultaneously with workflow, version control and an audit trail that tracks every change. Communication tools include IM, share, comment and approvals.

**Key Capabilities for Pharma**

- **Modelling and What-if Scenario Analysis**: Project future plans and play out what-if scenarios to see impacts on P&L, cash flow or balance sheet of the different strategies — like insourcing or outsourcing, stock level, workforce delocalization.
- **Analytic Information Hub**: Centralizes granular financial and operational information and enables in-depth modeling and analysis — fast.
- **Bottom-up Costs Calculation**: Empower Finance to control the dynamic variation of COGS and R&D by analyzing the relative impact on profitability and gathering data from all functions, processes and flows.
- **Accurate Capital Expense Planning**: Plan your CAPEX for R&D investment, manufacturing capabilities, construction, expansion of production facilities, and more.
- **Artificial Intelligence for Planning**: Develop long-term, top-down corporate plans including external factors that can affect product launch, like new regulations, workforce restriction, limitation on material shipping. Set targets that drive short-term, bottom-up tactical budgets.
- **Rolling Forecasts**: Respond flexibly to market changes by building periodic, rolling forecasts that automatically combine data from plans, budgets and actuals.
- **Manage Uncertainty**: Identify, assess risks and measure the volatility of decisions. Set metrics to monitor KPIs, establish risk thresholds, and play out what-ifs according to risk-exposure.
- **Extensive Profitability Analysis**: Understand the drivers impacting profitability throughout the product lifecycle — from R&D to clinical trial, launch until the end of life.
- **Data Governance & Lineage Tracking**: Starting from transactions and all the way through the cycle, manage all data within our integrated platform.
- **Financial Consolidation**: Use our consolidation engine to streamline the financial close from end-to-end with support for multiple GAAPs, IFRS, currencies and complex operational structures.
- **Financial Intelligence**: Improve insights with double-entry logic, currency translation, management, legal and regulatory roll-ups, unlimited multi-currency and interest support.
- **Collaboration Tools**: Teams work simultaneously with workflow, version control and an audit trail that tracks every change. Communication tools include IM, share, comment and approvals.

**Key Features:**

- **Unified CPM Platform**: We offer a unified, integrated financial and performance management solution that includes:
  - Financial Close and Consolidation
  - Budgeting, Forecasting, and Planning
  - Financial and Management Reporting
  - Profitability Analysis
  - Production Cost Planning and Control
  - Workforce Planning
  - Capital Expenses Planning
  - Advanced Analytics and Dashboarding

- **Integrated and Extended Planning (xP&A)**: CapEx, S&OP, Demand, Production, Capacity, HR and Workforce, Balance Sheet, Capital, Profitability, Strategic, and Cash Flow.

- **Self-Service Reporting & Analytics**: Produce reports, visual analytics and dashboards without IT. Complete complex calculations, create reports and dynamically pivot data for analysis without delay.

- **Microsoft Office Integration**: CCH Tagetik natively integrates with Word, PowerPoint and Excel and supports multiple output formats including PDF, PPT, HTML and XML.

- **Audit Trail & Workflow**: Capture detailed audit logs of all changes — by who and when. Collaborate across the organization with task lists, status and approval process.

- **System Integration**: CCH Tagetik has an open architecture and built-in ETL to fit seamlessly into an existing Microsoft, SAP or mixed technology environment.

---

**Why CCH Tagetik?**

- **Finance Owned**: Purpose built to be maintained by Finance, empowering finance and reducing dependency on IT.
- **Unified CPM Solution**: Consolidation, Planning and Reporting in one solution provide confidence in your data.
- **Reliability**: Our implementors and partners consistently deliver.
- **Cloud without Compromise**: On premise. On cloud. One solution. The choice is yours!
